

MERTCAN ÇETİNKAYA

Industrial Technologies & IT Specialist

05467267877 | 2006 | m3rt7132@gmail.com | Kocaeli/İstanbul | [[LinkedIn](#)] | [[Website ve Github](#)]

SUMMARY

A versatile technical specialist with a **strong analytical** foundation in software development (C, JavaScript, React) since the age of 10. I possess a **high capacity for fast learning** and logical problem-solving. My goal is to integrate my computational thinking skills with manufacturing, **CNC** technologies, and industrial mechanics. I am highly **adaptable**, capable of delivering result-oriented solutions whether on the factory floor (metal production/maintenance) or in digital environments (data processing/software).

SKILLS

- **Programming Languages (above mid):** JavaScript & TS, C#, C, MongoDB, SQL
- **Web Technologies:** React.js, Node.js, HTML, CSS, TailwindCSS
- **CAD/CAM & Industrial:** SolidWorks, Fusion360 (Learning), CNC Lathe&Milling Operator&Programming
- **Languages:** English (**B2-C1** EFSET cert.)
- **Graphic Design:** (AE, PS, LR basics)
- **Hobbies:** Electric guitar, Language learning, Reading book, Exploring nature, Researching

EXPERIENCE

Metal Production & Steel Fabrication Operator | Aisin | Tuzla, İstanbul

June 2026 – August 2026

Actively engaged in the metal production line and steel fabrication processes, gaining direct

- on-field experience in industrial manufacturing, factory workflows, and shift-based operational dynamics.

IT - Maintenance Trainee | Autoliv Cankor GOSB | Gebze, Kocaeli

September 2023 – June 2024

Actively contributed to the seamless operation of the factory's IT substructure by delivering

- comprehensive on-field and remote technical support to users, gaining practical experience with corporate workflows and occupational safety procedures.

EDUCATION

- **Computer Programming (Online 2 Years) | Atatürk Üniversitesi**

2024 – Ongoing - 2026 Expected

- **Software Development | 42 Kocaeli**

February 2025 - December 2025

Gained practical software development and algorithm design experience in C and JavaScript through a project-based, peer-to-peer learning model.

CERTIFICATES

- **CNC Lathe&Milling Adaptation and Programming** - YETGİM, Pendik Govern., Istanbul.

PROJECTS

- **Vardiyo (Detailed Shift&Overtime and Payroll Management App) | 2026 | [Website](#)**

Developed and deployed a complex web/mobile application using React and Capacitor that automates gross-to-net salary, severance pay, overtime, and shift schedule calculations.
